

## Make you Blackboard Course Available

When a course is created or uploaded into Blackboard it is, by default, unavailable to your students. You can see the course but your students cannot. For your students to see and access the course, you must make it available.

1. To make your course available to your students, log in to Blackboard.
2. Click on **Control Panel** under the left navigation bar.
3. In the **Course Options** section Click on **Settings**.
4. In the next window, click on **Course Availability**.
5. Under **Set Availability** mark the **Make Course Available Yes** radio button.
6. Click the **Submit** button at the bottom right of your screen.
7. Click **OK**, click **OK** again to complete the change. Your course is now available to your students.
