

Remove Discussion Board Threads

In the transition from Blackboard 6.3 to Blackboard 7.1, the discussion board threads (postings) are carried forward. In order to remove these threads or other unwanted threads and retain the discussion board topics you will need to delete the old threads.

1. Click on **Control Panel**.
2. Select **Discussion Board** from the **Course Tools** section.
3. Click on the course link.
4. Click the name of the forum.
5. At the bottom left verify that **Select All** is shown, then click **Go**. You should now have a checkmark next to every thread.
6. Click the **Remove** button on the toolbar.
7. Click the **OK** button to confirm the removal.
